Connect LED/Buzzer with NodeMCU and compose a program to turn ON LED for 1 sec later at regular intervals.

```
void setup()
     {
     pinMode(D0, OUTPUT);
     }
void loop()
     {
     digitalWrite(D0, HIGH);
     delay(500);
     digitalWrite(D0, LOW);
     delay(500);
     }
```
